

OPHTHALMOLOGY

Pe-Ha-Guard®

Pe-Ha-Guard® is a high-quality viscoelastic product based on hydroxypropyl methylcellulose for reliable cornea hydration during ophthalmic surgery.

It can also be used as gliding agent for conventional injectors and cartridge systems for intraocular lens implantation.

- Stable hydration of the cornea during surgery
- Optical clarity during surgery
- High compatibility with other viscoelastic substances and BSS
- Excellent gliding properties
- Easy to use and remove
- Sterile (by steam)
- Multi pack (box of 20 units)
- CE certified

SPECIFICATION:	Pe-Ha-Guard® 2.0 %
Hydroxypropyl methylcellulose	2.0 %
pH	6.8 - 7.4
Osmolality [mOsm/kg]	255 - 345
Volume [ml]	2.5
Shelf life [months]	36
COMPOSITION [1 ml]:	Pe-Ha-Guard® 2.0 %
Hydroxypropyl methylcellulose	20.00 mg
Sodium chloride	9.00 mg
Disodium hydrogen phosphate 2 H ₂ O	0.563 mg
Sodium dihydrogen phosphate 2 H ₂ O	0.045 mg
Water for injection	q.s.
