

## PIONEER OF MODERN VISCOELASTICS

### DEAR VALUED CUSTOMER,

In order to optimize our processes and enhance the efficiency of our logistics facility we decided to introduce the following standard carton variants:

	Standard carton variants	Applicable for ...
1	200 single boxes (1 ml and 2 ml)	Ophthalmic products Orthopaedic products
2	100 single boxes (3.0 ml and 4.8 ml)	Orthopaedic products
3	20x 10-piece multi-box	Ophthalmic products
4	4x 50-piece multi-box	Orthopaedic products

Pe-Ha-Guard® will not yet be changed, but remains in the traditional shipping carton. Your benefits are:

- Improved declaration of goods (new sticker on the shipping carton that shows all relevant information)
- The sticker includes the UDI which corresponds to the UDI on the single box or multi-box. This code contains GTIN, manufacturing date, shelf life and batch number.
- Uniform appearance; this is especially important if you forward the entire shipping carton to your customer
- No filling material, if a full box is order

The changeover will take place over the next few weeks. During this time, a mixture of the traditional shipping carton and the new standard carton is possible.

Please feel free to contact us if you have any questions.
