

# PIONEER OF MODERN **VISCOELASTICS**

*Advanced viscoelastic solutions for  
multiple medical needs.*

ADVANCING

# VISCOELASTIC SOLUTIONS

In highly controlled medical environments, performance is not optional. Every application requires stability, consistency and absolute control.

**ALBOMED develops viscoelastic solutions that support surgical precision and therapeutic effectiveness.**

By covering the entire value chain, we ensure consistent quality – with one clear goal: improving patients' quality of life.

## BUILT ON RESPONSIBILITY

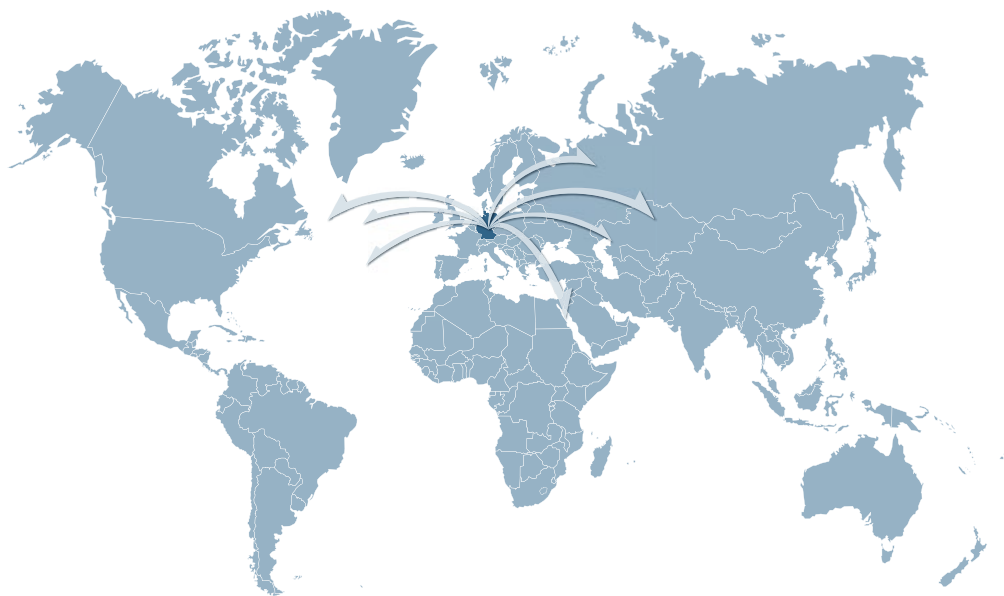

ALBOMED is an independent, family-run German medical device manufacturer specializing in hyaluronic acid- and HPMC-based viscoelastic solutions for ophthalmology and orthopaedics. As a mid-sized company, we combine scientific expertise with long-term responsibility and continuous investment in technology and quality.

This is what defines ALBOMED:

**Reliable, specialized and built for the long term.**

TRUSTED  
**WORLDWIDE**

BASED IN GERMANY 

Over more than two decades, ALBOMED has established itself as a reliable partner in international medical technology markets.

**25+**  
Years

**70+**  
Million

**60+**  
Countries

ADVANCING  
**PRODUCTION**

With many years of experience and extensive expertise, ALBOMED develops and manufactures high-quality viscoelastic medical devices.

All products are manufactured on site under the highest sterile conditions. State-of-the-art filling, mixing and blister packaging systems ensure safe and controlled production.

By continuously expanding digitalization and automation across our facilities, we are strengthening efficiency, consistency and future readiness.

Every ALBOMED product is developed with a clear focus on real clinical requirements.

As an independent German manufacturer with strong innovative capabilities, research and development are at the core of what we do. Through our own patents and a dedicated R&D department, we continuously drive innovation and ensure future readiness.

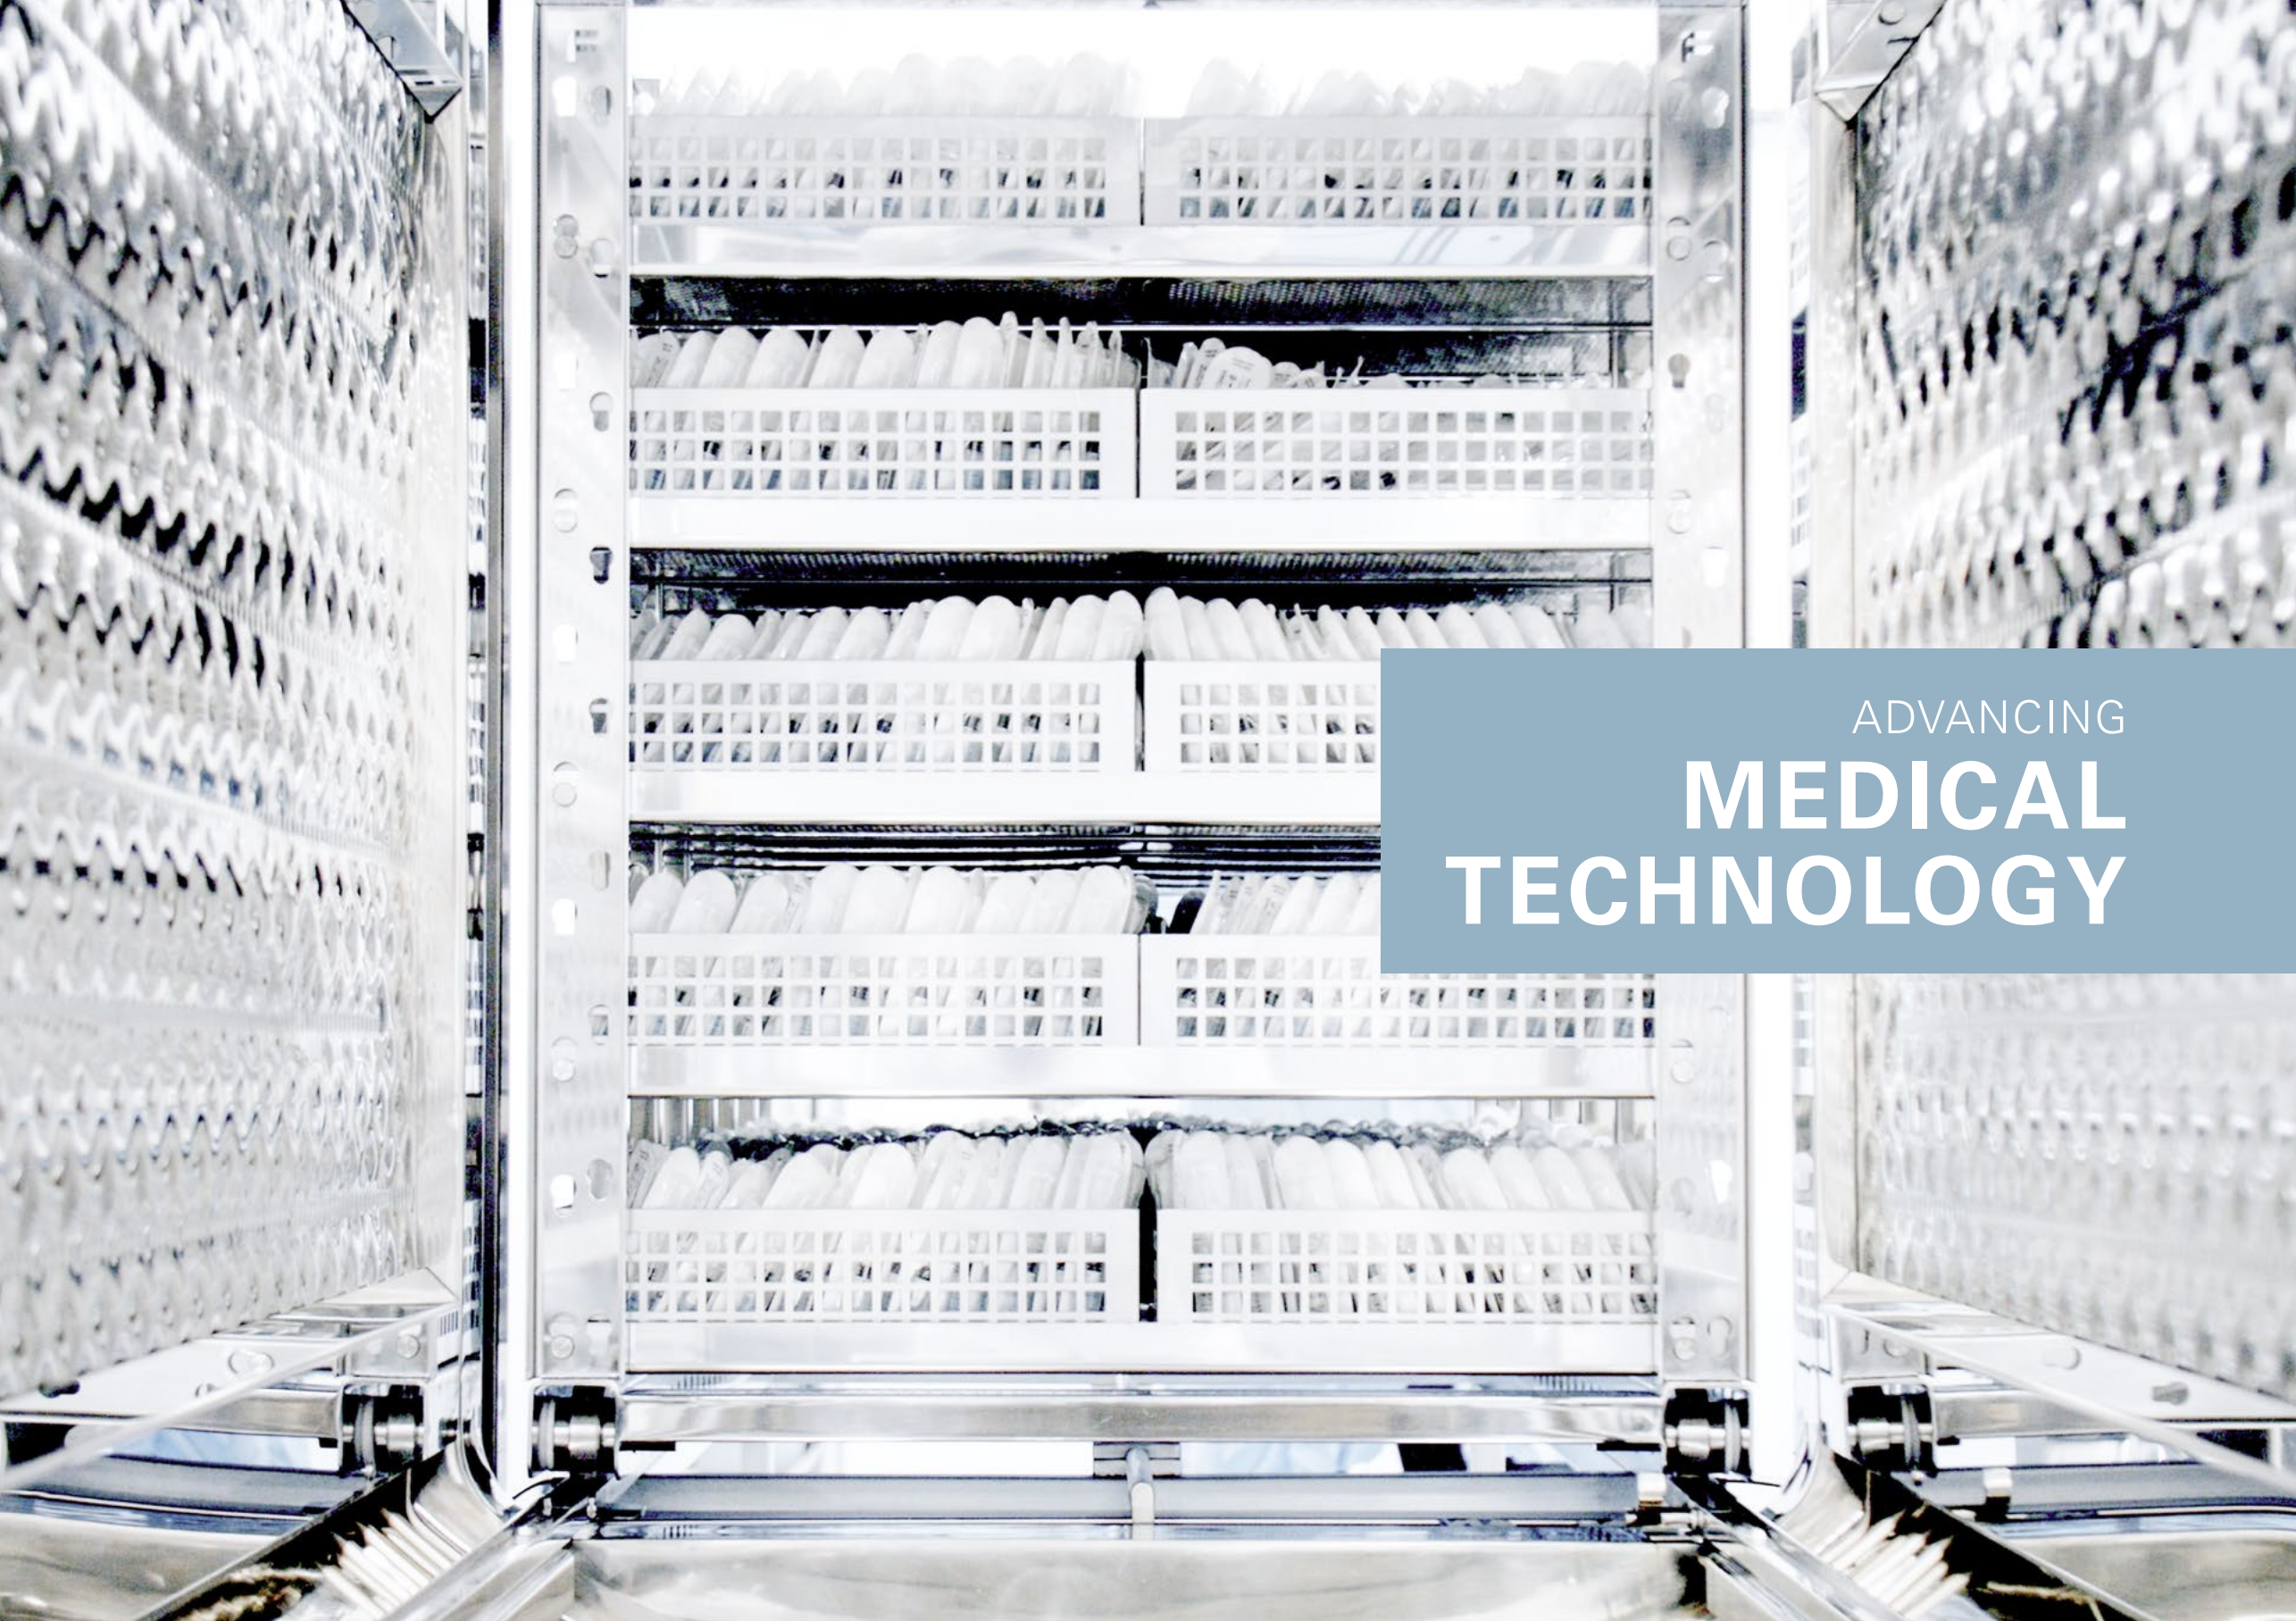

The highest product quality remains our top priority throughout every stage. From initial concept to final application, our approach is built on three key pillars:

- 1 Scientific Development**  
Science-driven development focused on real clinical needs, combining material expertise and validated methods to create high-performance and application-oriented formulations.
- 2 Contract Manufacturing**  
Integrated manufacturing capabilities, including mixing, filling and sterile packaging, ensure consistent quality, controlled processes and a stable supply under the highest standards.
- 3 Clinically Relevant Solutions**  
The result: products designed for real surgical and therapeutic environments, offering safety, usability and predictable performance in daily clinical practice.

This integrated approach ensures that our products are not only precisely engineered, but also aligned with the practical needs of healthcare professionals.

# COMMITMENT TO QUALITY

Every ALBOMED product is developed and manufactured with a clear focus on quality, safety and reliability.

Our processes are designed to ensure consistent product performance, supported by continuous in-process controls and strict quality standards throughout the entire production cycle.

We were among the first companies to align with the requirements of the new European Medical Device Regulation (MDR), reflecting our commitment to the highest regulatory standards.

- MDR (EU 2017/745) compliant
- MDSAP audited
- ISO 13485-based quality system

# OUR BUSINESS FIELDS

## OPHTHALMOLOGY

### PRECISION IN EYE SURGERY

#### Core business since founding in 1995

Viscoelastics are important components for successful eye surgery. Our high-quality products support you reliably and efficiently in every phase of the procedure and allow you to concentrate on what is important: your patient!

## ORTHOPAEDICS

### RESTORING JOINT FUNCTION

#### Started end of 2012

The synovial fluid in the human body contains natural hyaluronic acid, which cushions, lubricates, and protects joint tissue. Various factors cause these functions to be disrupted, which in turn can lead to pain in the joints. Our hyaluronic acid therapies help to preserve and restore joint function and achieve a pain-free state – so your patients get back to active life.

# ADVANCING INTEGRATED EXCELLENCE

ALBOMED operates across three sites in Germany, combining development, manufacturing and operational expertise within one integrated system. Each location contributes specialized capabilities while working as part of a coordinated structure:

📍 **Innovation & Market Access – Burghann, BY**

Driving innovation, product strategy and market access through regulatory expertise, research & development and close customer engagement.

📍 **Integrated Operations – Unna I, NRW**

Ensuring efficient processes, stable supply and organizational excellence across production, logistics, quality management and finance.

📍 **Advanced Manufacturing & Quality – Unna II, NRW**

Combining production, laboratory capabilities and quality assurance to deliver consistent product performance and continuous improvement.

Together, these capabilities form one integrated system – enabling innovation, ensuring quality and delivering reliable supply for our partners worldwide.

## BUILDING LONG-TERM PARTNERSHIPS

ALBOMED collaborates with selected partners worldwide to ensure sustainable market access and professional product representation.

Our partnerships are based on transparency, trust and shared long-term objectives.

We support our partners with **regulatory expertise, technical knowledge and structured processes** – enabling sustainable development across international markets.
